

JAISON ABDIEL PALACIO ÁVILA

PROFESSIONAL PROFILE

Software Developer with a strong technical background and experience in systems support and analysis. Passionate about technology, continuous learning, and building functional and scalable solutions. Recognized for my responsibility, commitment, and teamwork.

PERSONAL INFORMATION

- Phone: (507) 6158-4828
- Email: jaisonpalaciodev@gmail.com
- Address: Arraiján, Panamá

EDUCATION

Universidad Tecnológica de Panamá (UTP)

Bachelor of Science in Software Development, 2023

Associate Degree in Software Development, 2022

Instituto Fermín Naudeau

High School Diploma in Science, Major in Computer Science, 2013

SOFTWARE DEVELOPER

WORK EXPERIENCE

Full Stack Developer

Assa Compañía de Seguros, 2022 - Present

- End-to-End Development: Designing and implementing scalable web applications, from responsive front-end interfaces to robust back-end architectures and RESTful APIs.

Systems Analyst

Vidatec Laboratory, 2021-2022

- Responsible for analyzing, providing technical support for, and maintaining internal systems, ensuring the operational continuity of technology services.

Technical Support

GBM Panamá, 2020-2021

- Provided hardware and software technical support, troubleshooting, and equipment maintenance for corporate clients.

IT Assistant

Grupo Primavera, 2018-2020

- Management of internal systems, hardware configuration, and technical support for internal users.

TECHNICAL SKILLS

Frontend

- NextJs/React
 - Develop web applications using Next.js and React, applying modern development best practices.
 - Use core React hooks (useState, useEffect, useContext, etc.) for efficient state and lifecycle management.
 - Implement Server-Side Rendering (SSR) and optimized data fetching strategies in Next.js.
 - Build reusable custom hooks to encapsulate and manage business logic.
 - Manage global state using Zustand, Redux, and Context API.
 - Implement authentication and authorization flows using NextAuth and JWT.
 - Optimize application performance through lazy loading, code splitting, and SEO best practices in Next.js.
 - Integrate APIs with efficient data fetching and caching using React Query (TanStack Query).
 - Develop and manage forms using Formik and React Hook Form.
 - Apply schema-based validation using Yup and Zod.
 - Design responsive and modern user interfaces using Tailwind CSS.
 - Develop real-time features using WebSockets.
 - Write scalable and type-safe code using TypeScript.

Backend

- Nodejs
 - Database connection and integration (relational and non-relational databases).
 - Design and development of scalable APIs following best architectural practices.
 - Full implementation of CRUD operations (Create, Read, Update, Delete) with efficient data handling.
 - Configuration and management of backend servers, including development and production environments.
 - Implementation and use of middlewares for authentication, data validation, error handling, and logging.
 - Integration of authentication and authorization systems (JWT, sessions, roles, and permissions).
 - Automated email sending using SMTP services and tools like Nodemailer.
 - Management of environment variables and secure application configuration.
 - Consumption and integration of external APIs.
 - Use of ORMs/ODMs such as Sequelize, Prisma, or Mongoose.
 - Data validation and sanitization to ensure application security.
- C# (.Net)
 - Implement Entity Framework and LINQ for efficient data access, querying, and manipulation.
 - Apply Dependency Injection to improve code decoupling and maintainability.
 - Design solutions based on Clean Architecture to ensure scalability and proper system organization.
 - Implement design patterns such as Repository and Unit of Work for efficient data persistence management.
 - Document APIs using Swagger, improving usability, testing, and integration for other teams.

Git

- Use Git for version control in collaborative development environments.
- Manage branches following best practices (feature, develop, main workflows).
- Perform merge and rebase, efficiently resolving code conflicts.
- Maintain repository history using reverts, ensuring codebase stability.
- Use stash for temporary change management during development.
- Collaborate with teams using platforms such as GitHub and GitLab

Data Base

- Work with both relational and non-relational databases, ensuring efficient data modeling and management.
- Use databases such as PostgreSQL, MongoDB, and Redis for different application needs.
- Design and optimize database schemas to improve performance and scalability.
- Write efficient queries and handle data operations with a focus on performance.
- Apply best practices for data integrity, consistency, and security.
